

LAJPAT RAI MEHRA'S NEUROTHERAPY TREATMENT AND RESEARCH INSTITUTE

Research centre: Vill: Suryamal, Taluka mokhada, Dist : Palghar,
Maharashtra , India

PROSPECTUS

Diploma in L.M.N.T (Lajpatrai Mehra's Neurotherapy)

Dr. Lajpatrai Mehra (Founder of Neurotherapy)

Dr. Lajpatrai Mehra, was born in a highly respected family of Amritsar, as the 7th offspring of Sri. Ramgopal Mehra and Smt. Kesara Devi, on 23rd August 1932. A living legend of his times, he is renowned for developing a novel technique (LMNT) of curing the masses without recourse to medicines, and for his selfless and dedicated service to humanity.

At the tender age of 11, he was afflicted with a severe stomach ache, which lasted for several months, which could not be relieved with the best of medical help available at the time. By providence, he met an old man who asked him to lie face down; and cured him almost instantly, by a simple native technique of 'setting the navel' by manipulating his hands and legs in a special fashion.

Helping others came naturally to Lajpatrai. Unlike other children of his age, he did not allow the incident to pass by. Instead, he constantly meditated upon the miracle wrought in his body by the seemingly crude technique and longed to relieve others of similar pains.

Ancient Indian texts refer to the navel as being the epicenter of the entire body. Disturbances in the position of the navel in relation to other parts of the abdomen, is the main cause for digestive disorders.

Even though the old man did not teach him the exact technique, the innovative Lajpatrai, recollected that the process exerted pressure on certain points of his body. His mother often used to suffer from stomach aches. With her as a willing subject, he devised a novel method of using his feet to produce a similar effect, to relieve her of her pains. When he had perfected the technique, he started treating others in his neighborhood. Soon hordes of people, suffering from constipation, dysentery and other abdominal disorders, from nearby and distant areas, would line up in front of his father's home, whom he treated with his newly-founded technique, with great success.

The riots during partition claimed his house as one of its early victims. The family, once prosperous, had to leave all their belongings and arrived in Mumbai (formerly known as Bombay) as refugees, in 1947.

As the bread-winner of a large household (the only son among 9 siblings – he had 6 elder and two younger sisters), young Lajpatrai had a grueling and hectic schedule. In spite of this, he would spend a major part of his after-work hours, in giving free treatment to patients, a habit developed from the very tender age of 11 years. In the process, he invented several newer techniques, and developed a distinctively original method of curing people from several types of ailments, without medicines.

His formal education was until the 10th class; but he could not give the exams due to the partition of India and formation of Pakistan. However, he was doing a lot of free seva in refugee camps. So he was awarded the Matriculation certificate in spite of not sitting for the exams. But the idea of receiving a certificate without giving the examination was anathema

to him. After about four years he sat for and successfully completed the examination for the tenth class.

Family circumstances did not permit him to study further. But nothing could dampen his obsession of upgrading his knowledge with intensive study on his own, on books related to nature cure, human anatomy & physiology, from a very young age. Eventually, he qualified for a degree in Naturopathy.

In due course, based on practical experience gained by treating hundreds of patients and, integrating it with wisdom from ancient Indian scriptures, he applied the principles of physiology in a novel approach, to cure ailments in a manner which has no parallel in modern times. His technique has since been christened by students and well-wishers as Dr. Lajpatrai Mehra's Neurotherapy (LMNT).

His compassionate outlook and passionate dedication to give relief to the maximum number of patients, makes him train as many students as possible. To date, he, with just a few dedicated followers, has trained more than 1000 students; conducted more than a hundred free Neurotherapy camps all over the country; and treated thousands of patients in India and quite a few patients abroad, too.

There are presently, more than 650 LMNT centers all over India, plus one each in Canada, U.K., Italy and Australia. Most of these centers have been established within the last 10 years, following the establishment of the residential training centre, - "Dr. Lajpatrai Mehra's Neurotherapy Academy" at Suryamal near Wada, 125 km from Mumbai, in Mokhada Taluk, Thane District. Here students come from all over India, to give a concrete shape to his dream of setting up at least one LMNT centre in every six villages. More than three thousand families are earning their bread and butter through this therapy.

Introduction:

Neurotherapy, "Nadi Mardan Kriya" is an ancient Indian rehabilitative therapy based on the vedic principles & philosophy. This natural healing therapy deals with nerves, muscles, joints and blood & lymphatic channels. Authorities in the field believe that the body is coordinate by three different humors or energy forces as Vata (air) pitta (bile) and kapha(water). Neurotherapy helps in restoring and balancing the energy forces of the body that regulates the physiological equilibrium to perform better function of the body mind spirit .

Ayurveda deals almost in all branches of medical science. 'Nadi Vigyan' (knowledge of nervous system) is one of them, that has developed neurotherapy thousands of years ago.

Neurotherapy has always been used in ayurvedic medicine as a rehabilitative treatment known by different names. Some of the traditional names by which of ayurvedic neurotherapy is known in India, 'Ladara' in north India and as ' Kerali Massage ' in the south. Neurotherapy was re-pioneered by Mr. Lajpatrai Mehra in Mumbai India. The term Neurotherapy (neuro means nadi or nerves; therapy is application), was coined in 1950's. Neurotherapy, places chief emphasis upon the organism's integrity of the body's mechanism as being the most important factor in the maintenance of health.

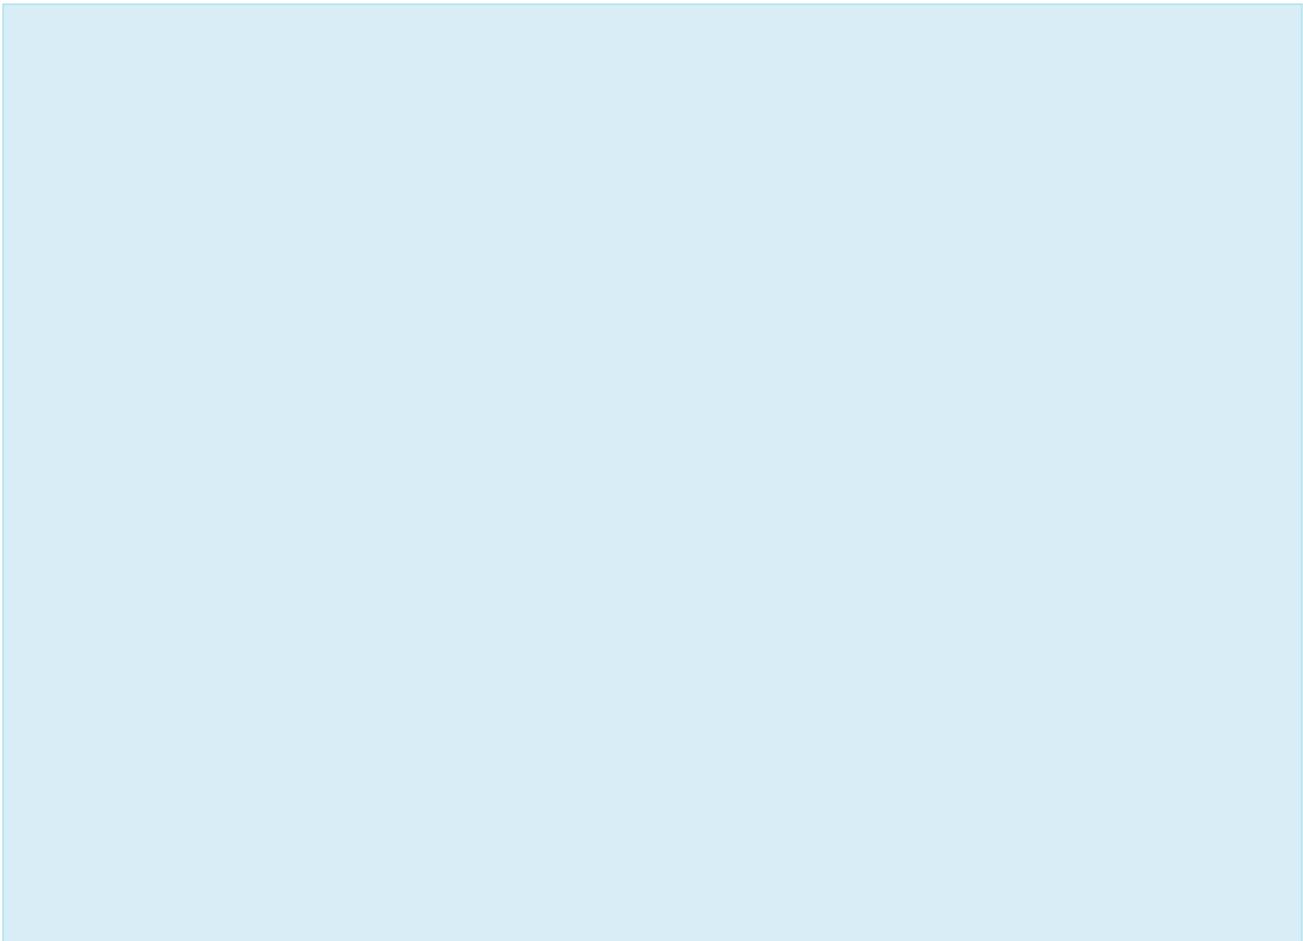

How does it work?

Neurotherapy is a complete system of healing, incorporating mechanical, psychological, bio-force, and biochemical aspects. It discovers the root cause of the disease and treats the same in an integrated manner. The disorder of the bodily organs causes an imbalance in the biochemical forces leading to the development of diseases. The therapist activates or deactivates the organ(s), through pressure or massage on the nerve channels to stimulate or depress the blood, & other body fluids and the nerve currents so as to restoring the balance and harmony of the body thus helping the body regain its equilibrium.

What therapeutic method is applied?

Unlike most other body-work therapy, pressure & massage is applied to different part of the body mainly through feet and occasionally through hands. Two chairs are placed one on either side of the patient. The therapists rests his/her weight on chair and applies pressure by standing on the patient's body with the weight and the pressure being skillfully controlled. However, the pressure applied to the connecting nerve channels is regulated according to the age sex and tolerance of the patient. The other technique used in Neurotherapy, is massage (massage is applied in the similar way of pressure application)

which results in the inflow of the blood supply to the organs stretching the tissues, muscles and the nerves.

LMNT One year Diploma Course

Batch commences from 01-05-2017 (in 3 semesters of 4 months each)

Fees : Rs. 60,000.

Eligibility : Minimum 12th pass (in any subject) or above

Seat : 20 student / per study center

Age : 18 years and above

Medium : Hindi and English

Contact No. : +91-9855977608, +91-9463062141, 9815220699

E-mail : research.lmnt@gmail.com

Website : www.neurotherapyindia.org

Address : Dr.Lajpatrai Mehra's Neurotherapy treatment and
research institute

Vill: Suryamal, Taluka Mokhada Dist: Palghar,

Maharashtra, India,

Pin-401604.

Courses Semester-wise

First Semester: Four Months

Basics of Neurotherapy

Points and Cautions for treatment

Code names and formulae for important treatments

Chemicals, Hormones and Endocrine Disorders

Acid – Base Imbalance I (Acidosis & Alkalosis)

Infectious Diseases

Inflammatory Diseases

Autoimmune Disorders

Second Semester: Four Months

Gastrointestinal Disorders

Nutritional Disorders

Genetic and Reproductive System Disorders

Urinary System Disorders

Cardiovascular System and Blood Disorders

Respiratory System Disorders

Orthopedic Disorders

Neuromuscular Disorders

Disorders of Special Senses and Skin

Third Semester: Four Months

This semester will comprise of practical trainings, independent interactions and treatments, Conducting free Neurotherapy treatment camps, Do's and Don'ts for Better living, Submission of a dissertation.

* course material subject to changes as per requirement without prior notice

COURSE FEE STRUCTURE

Prospectus Fees and Application Fee: Rs. 200

Enrollment Fee : Rs. 12,000

Fee for First Semester : Rs. 15,000

Fee for Second Semester : Rs. 15,000

Fee for Third Semester : Rs. 15,000

Examination Fee : Rs. 3000

NOTE: (Inclusive of coaching, study material).

- 6 month internship is necessary and it will be paid and only conducted at Imnt authorized treatments center at pan India

AIMS AND OBJECTIVES

Produce Practitioners/Therapists/Experts who help in preventing and curing the diseases and promoting health by drugless, safe and easily available system of medicine without any side effects.

Internship training for therapists at any registered Neurotherapy centers.

Spread awareness about Neurotherapy by organizing camps in various parts of the City/Country.

Neurotherapy has taken rapid strides in India in recent years. Philosophy and science of Neurotherapy is vast and deep rooted. There is a need for proper education of this subject. Keeping this in mind we wish to educate people by providing a thorough study of this subject by offering a ONE YEAR Diploma Course in Neurotherapy.

Rules and Regulations

1. A candidate has to submit proof of his/her age, educational qualification, proof of residence by producing relevant documents (attested copies) along with duly filled form at the time of admission.
2. It is compulsory to have at least 80% attendance in each year. A student having less than 80% attendance will not be allowed to appear in the examination.
3. A student has to clear all the three semester, within a period of two years after taking admission. If he/she is unable to do so he/she will have to take fresh admission.
4. Examination will be conducted at the place decided by the managing committee of the institute.
5. Diploma will be awarded to candidates after successfully qualifying the one year course and after completion of 6 months as Intern at one of our Authorized Lmnt centre.
6. Admission can be cancelled at any stage if any of the particulars given by the student are found to be incorrect.

7. In matter of admission, course of study, examination, issuing of diploma, all decisions will rest with the Management Committee of the Institute and their decision is final.
8. If a Student/Therapist of Neurotherapy is found misusing his/her expertise of diploma of Neurotherapy, the Management Committee has the right to cancel the diploma and take any required action against him/her.
9. Viva shall constitute a compulsory part of the examination. Candidates who do not clear Viva shall be declared unsuccessful in that semester's examination.
10. Medium of examination shall be in HINDI or ENGLISH.
11. Minimum pass marks for each paper, practical, Viva-voce and project work are 50% (Second Division). A candidate who secures 60% or more will be placed in First Division. Distinction marks will be securing 75% and above.
12. Fee not refundable and not transferable.
13. During this study period, must participate at least 6 promotional events.
14. After completion of course must attend 3 conferences in a year.
15. Renewal of Registration certificate in every 3 year.
16. A therapist cannot teach the others without doing masters course.
17. One cannot publish any books about Neurotherapy without having permission from state or central authority.

Note: Above rules and regulations are subject to changes or revision at anytime without assigning any reason. (Juridical area Punjab&Haryana High court).

PROJECT WORK

Project will be submit before last weeks of 3rd semester

- Minimum three case history
- Contains with testimonials
- Before treatment and after treatment reports
- Brief note about disease
- Relevant photographs (Disease related)
- Explanations of LMNT treatments
- Signature of Research coordinator

BENEFITS OF NEUROTHERAPY COURSE:-

- (1) You can treat yourself almost of every minor and major disease.
- (2) You can save your regular medicinal expenditure in every month.
- (3) By your experience you can start your own Neurotherapy centre.
- (4) You will get the full support of our Neurotherapy Pariwar throughout the country and abroad.

(5) You can save not only the huge money but also you can avoid the irrelevant medicinal side-effects.

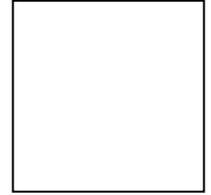

(6) By virtue of medicine-less therapy, LMNT will play the very important role in near future and you will also be a part of it.

(7) You can get a clear idea of diet and life-style for specific disease.

(8) You will be eligible to apply to work all the Neurotherapy centers throughout the world.
